Professional Summary

Software Engineer with nearly 2 years of experience in enterprise application development, backend engineering, RESTful APIs, cloud technologies, CI/CD, Generative AI, and Agentic AI. Currently specializing in Java and Spring Boot, with hands-on experience building backend applications using Spring MVC, Spring Data JPA, Hibernate, SQL, and Microservices Architecture through enterprise-style personal projects. Experienced with Node.js, Express.js, Git, Docker, Azure, and DevOps, with knowledge of RAG, LLMs, and LangChain.

Work Experience

Hexaware Technologies

Software Engineer Level 2 – R&D Innovation Lab

Jul 2026 – Present

Chennai, India

- Designed and integrated **Agentic AI workflows and orchestration solutions** into enterprise applications, improving workflow automation efficiency by **30%** and reducing manual processing efforts by **25%**.
- Developed **AI agents, LLM-powered workflows, and enterprise API integrations**, optimizing orchestration, secure data exchange, error handling, and backend scalability while reducing workflow execution time by **20%**.

Hexaware Technologies

Software Engineer Level 1 – R&D Innovation Lab

Jul 2025 – Jul 2026

Chennai, India

- Led a **team of 3 engineers** in developing and delivering scalable backend solutions using **Node.js, Express.js, RESTful APIs, and MongoDB**, ensuring reliable application performance and supporting business-critical functionality.
- Designed and enhanced **backend APIs with Express.js**, implementing request validation, business logic, exception handling, and database integration, reducing API-related defects by **20%** and improving maintainability.
- Developed and maintained **CI/CD pipelines** for automated build, testing, and deployment processes, reducing manual deployment effort by **30%** and improving release efficiency and deployment consistency.
- Used **Azure App Service, Key Vault, Logic Apps, & Blob Storage** for cloud deployments & workflows, improving reliability by **25%**.

Hexaware Technologies

Associate Software Engineer – R&D Innovation Lab

Nov 2024 – Jul 2025

Chennai, India

- Resolved **30+ critical backend and REST API defects** in TypeScript and Express.js services through debugging, performance analysis, and database optimization, improving application stability.
- Improved application performance by **40%** through optimization of business logic, query execution, and data access patterns across Express.js and MongoDB services.
- Improved application security by remediating vulnerabilities identified through **SAST/SCA assessments**, addressing XSS, CSRF, and third-party dependency risks through secure coding practices.

Projects

FirstSteps | Employee Onboarding Platform *Node/TypeScript/Oracle HCM/OIC/Azure Logic Apps/Blob Storage/Azure AD/DocuSign/AI*

- Designed and delivered a multi-step digital onboarding platform using **Node.js/TypeScript REST APIs** for candidate data, step progress (pre/core/post), admin controls, **2FA/OTP login**, and **role-based Azure AD auth** across regions and hiring tracks.
- Integrated **Oracle HCM/OIC, DocuSign, and AI document classification / face verification** to reduce manual data entry and strengthen identity checks.
- Built **Azure Logic Apps email workflows** for OTP and onboarding notifications; owned **Azure Blob Storage** (secure uploads, CDN, SAS) and **Azure CI/CD** for multi-env releases (QA/UAT/Prod).

BankNova | Enterprise Digital Banking Platform *Java/Spring Boot/Spring Cloud Gateway/Spring Security/Spring AI/Kafka/Redis*

- Developed a multi-module **Spring Boot microservices banking platform** with **Spring Cloud Gateway**, PostgreSQL, Flyway, & shared service contracts, supporting authentication, accounts, transfers, loans, notifications, & AI-powered features.
- Implemented an **event-driven money transfer system** using **Apache Kafka & Saga orchestration**, with JWT/RBAC, OAuth 2.0, idempotent transactions, optimistic locking, fraud checks, & a **Spring AI RAG assistant** powered by OpenAI embeddings & pgvector.

Technical Skills

Languages: Java (Core, J2EE/Enterprise Java), JavaScript, TypeScript, SQL, Python, C, C++

Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, RESTful Web Services, Node.js, Express.js
AI & GenAI: RAG (Retrieval-Augmented Generation), LLMs, Agentic AI, LangChain, LangGraph, MCP Server

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Apache Kafka, Redis

Cloud, DevOps & Tools: Azure, Azure DevOps, CI/CD, Git, GitHub, Docker, Kubernetes, Maven, NPM, SonarQube, Cursor

Frontend, API & Testing: React.js, Angular, HTML5, CSS3, Postman, Swagger/OpenAPI, JUnit, Mockito

Software Engineering: Agile/Scrum, Microservices, REST API Design, OOP, HLD, LLD

Education

Technocrats Institute of Technology, Bhopal

B.Tech in Information Technology

2020 – 2024

CGPA: 8.73
